

Dr. Subhash Chandra Khurana

(b. February 16, 1948)

Former Professor, Department of Vegetable Science, CCS Haryana Agricultural University, Hisar-125 004 (Haryana)

Email address: sckhurana@hau.net.in

Dr. Khurana has made significant contribution in agronomical requirement for ware and seed potato production in Kurukshetra region of Haryana. He was instrumental in adaptation of potato variety *Kufri Badshah* by farmers of this region. He has developed an equation to work out relationship between PAR interception and tuber yield in potato. Dr. Khurana also developed several remunerative potato-based cropping systems for Haryana. He has guided six M. Sc. and two Ph. D. students. He has published over 200 research/review papers and popular articles.
